

## NOTICE TO OBSONO SUBSCRIBERS PERTAINING TO PORK COVERAGE

We have listened to your feedback and would like to announce some exciting changes coming to the pork section of the OBSONO report. In the pursuit of keeping OBSONO as relevant and useful to our valued subscribers as possible, we will be adding a number of highly requested cuts to our coverage, as well as removing a smaller, select number of items.

Pork cuts that will be **added** to OBSONO coverage include:

- Boneless Ham Muscles 4-Way Trimmed to Blue
- Skinless Bellies 11/13
- Boneless Sirloin
- Trimmed Picnics 4/8, SS (boxed)
- Boneless Butts
- Spareribs, Medium, Fresh (Vacpak)
- Loin Back Ribs 2/up

Pork cuts that will be **removed** from OBSONO coverage include:

- Select Hams 17/20
- Select Hams 20/23
- Sq. Cut Bellies 12/14
- Sq. Cut Bellies 16/18

*Note:* Select Hams 23/27 and Sq. Cut Bellies 14/16 will remain on the report.

*Explanation for removals:* 12/14 and 16/18 Sq. Cut Bellies as well as 17/20 Hams have traded under extremely light volume in recent years making price discovery difficult. 20/23 Hams tend to track very closely with 23/27 Hams. As hog weights continue to trend higher, 23/27 Hams have become the dominant weight range for both domestic and international trade in terms of volume.

We would like to hear any comments or concerns pertaining to these upcoming changes. Please feel free to email us at [help@obsono.com](mailto:help@obsono.com)

Thank you for your continued support,

OBSONO staff
